Abstract (en)

The present invention relates to a cooking device (1) comprising a body (10), a control panel (11) provided on the body (10), a control element (12) for adjusting a power level of a heat source, the control element (12) comprising a shaft (13) extending through the control panel (11) and a control knob (20) connected to the shaft (13) for rotating the shaft. As an improvement, the control knob (20) of the subject matter cooking device (1) comprises at least one outer body (70) movable relative to the shaft (13) in an axial direction of the shaft (13), at least one inner body (60) connected to the shaft (13) in a manner not movable relative to the shaft (13) wherein the inner body (60) is located at least partly in an opening (72) of the outer body (70) and the inner body (60) is exposed to be gripped by a user when the outer body (70) is moved in a direction towards the control panel (11).
