Abstract (en)

[origin: WO2017207672A1] An aerosol-generating article (2) comprises an aerosol-forming substrate (4), a combustible heat source (3) and at least one layer of fibre-reinforced aerogel (5) circumscribing at least a portion of the length of the combustible heat source (3). The aerosol-generating article (2) also comprises one or more airflow pathways along which air may be drawn through the article (2) for inhalation by a user, and one or more non-combustible, substantially air impermeable barriers between the combustible heat source (3) and the aerosol forming substrate (4).
