Abstract (en)
[origin: WO2017207870A1] The invention relates to a mattress (10) for an aeroplane. At the end of the mattress (10), there is a hood (15) inside the inner space (G) of which the mattress (10) may be rolled for storage. The hood (15) may be placed around a headrest of an aeroplane seat to support the mattress (10) to the seat. The mattress (10) further comprises notches (g1, g2) for seat belts to ensure their trouble-free functioning and to keep the mattress in place in relation to the seat.
