Abstract (en)

[origin: WO2017202407A1] The invention relates to a pump jug attachment (100) for a beverage jug, consisting of a housing (10), a pump bellows (50) which is arranged in the housing (10) and which comprises a riser pipe connection on a lower face and a head element (52) on the upper face. The pump jug attachment additionally comprises a pump lever (20) which is mounted on the housing (10) via a pivot joint (14) and which is connected to the head element (52) via a transmission element with multiple joints (31, 33). The pump jug attachment (100) is characterized in that the transmission element is designed as a double-jointed lever (32) with an upper joint (33) and a lower joint (31). The upper joint (33) is movably mounted in or on the pump lever (20), and the lower joint (31) is coupled to the upper face of the pump bellows (50).
