Abstract (en)
[origin: WO2017207071A1] The invention relates to a vacuum cleaner, comprising a housing (14), a vacuum assembly device (32) arranged in the housing (14), a length-adjustable tube device (16) arranged on or in the housing (14), an arched handle unit (66) connected to the housing (14) and connected to the tube device (16) and/or at least partially formed by the tube device (16), and an acting element (280) which moves in relation to the tube device (16) and via which an unlocking of the tube device (16) can be actuated for a length adjustment, characterised in that an operating unit (322) is arranged on the arched handle unit (66), which acts on the acting element (280) and via which a movement of the acting element (280) can be actuated.
