Abstract (en)

[origin: WO2017209889A1] A commercial dishwasher for crockery or utensils, which is in the form of a box-type dishwasher (200) or in the form of a conveyor dishwasher (100), wherein the dishwasher has at least one controllable, capacitive deionization unit (50) with an inlet (71) for fresh water and an outlet (51) for demineralized water and a control device (10) which is associated at least with the deionization unit (50). The control device (10) is designed to automatically or selectively automatically adjust, preferably in a regulating manner, at least one parameter which characterizes the operation of the deionization unit (50), specifically depending on at least one parameter which characterizes the quality of the fresh water at the inlet (71) of the deionization unit (50) and/or depending on at least one parameter which characterizes the quality of the demineralized water at the outlet (51) of the deionization unit (50).
