Abstract (en)
[origin: WO2017207101A1] The invention relates to a conveying system for bulk goods, in particular plastic granules, which conveying system has at least two senders (A to C) and at least two receivers (I to IV), which are connected to each other by conveying lines (7 to 9) via at least one switch station (1). The switch station (1) has at least two inlets (4 to 6) and at least two outlets (10 to 12), which are each provided with a valve (13) and which are provided on a coupling tube (2) that connects the inlets (4 to 6) and the outlets (10 to 12). The switch station (1) has at least one venting valve (14, 15, 32), which is provided on the coupling tube (2).
