Abstract (en)
[origin: WO2017207909A1] The invention relates to a method of chromating a component comprising an aluminium-based alloy and comprising the steps of supplying the component comprising, on at least one surface of the component, an aluminium oxide-based layer, immersing the component in a chromating bath comprising chrome III and carrying out a chemical conversion of the component in the chromating bath. The invention also relates to a component obtained by this method.
