Abstract (en)
[origin: WO2017202486A1] The present invention relates to a slab-shaped element, in particular a floor element for forming a large-area floor, which is equipped with a connection means on at least one outer edge for connection to further, in particular identical elements, wherein the connection means has a sealing lip which is inserted in a form-fitting manner into a groove which is present on at least one outer edge on the further, in particular identical floor element, and wherein the connection means preferably has a displacement channel which, in the case of the form-fitting connection of the floor elements, is suitable for receiving excess jointing material.
