Abstract (en)
[origin: WO2017207257A1] The invention relates to a baseboard (12) for laying floor-covering base strips as a wall termination, comprising a strip-shaped main body (10), which can be arranged parallel to the wall (30) and which has a bead profiled element (16) on the top side (14) of the main body facing away from the floor (28), which bead profiled element (16) is provided with a casing (20) that matches the floor material and the main body (10) has a holding region (38) for strip-shaped floor-covering elements (36) on the front side (18) of the main body between the bead profiled element (16) and the floor (28). The invention further relates to a method for producing a baseboard, wherein a main body (10) having a bead profiled element (16) is provided, the bead profiled element (16) is provided with a casing (20) that matches the floor material (34), strip-shaped floor material sections (36) are attached to a front side (18) of the main body (10), and the main body (10) is fastened to a wall (30).
