Abstract (en)
[origin: WO2017201555A1] The invention relates to a tent (4), comprising a supporting frame (7), a tent skin (10) supported on the supporting frame (7), and a tent bottom (3), wherein the tent bottom (3) is formed by an inflatable body, which is planar in the inflated state and the covering and bottom layers (5, 6) of which consist of a flexible material and are connected to each other by a plurality of connecting threads or fibers (13) and are held at a maximum normal distance from each other in the inflated state.
