Abstract (en)
[origin: WO2017207422A1] The invention relates to a motor vehicle lock comprising a lock mechanism and comprising a lock housing for receiving the lock mechanism, wherein the lock mechanism has at least one actuation lever that can pivot about a geometrical lever axis, wherein a bearing bushing element is provided, on which the actuation lever is radially mounted, wherein the actuation lever is axially, bilaterally mounted on the bearing bushing element and coupled to the bearing bushing element via a bayonet closure for this purpose, and in the assembly of the motor vehicle lock, the actuation lever and the bearing bushing element can be pre-assembled to form a separate unit via the creation of the bayonet closure.
