Abstract (en)

[origin: WO2017203318A1] The present invention relates to an offloading line (104, 103, 105) comprising an intermediate portion (103), wherein said intermediate portion (103) comprises: - a first tube (201) formed by more than 60% of High Density Polyethylene and having ratio between a diameter of the first tube and a thickness of a side of the first tube (201) below 15; - a second tube (203) adapted to be installed inside the first tube and being removable from the first tube (201) by pulling said second tube (201) from the first tube (201).
