Abstract (en)

[origin: WO2017207245A1] The invention relates to a household appliance (1) for preparing food, comprising a housing (2) having a first outer part (3, 10), on which an operating device (4) for adjusting the operating conditions of the household appliance (1) is formed, and comprising at least one second outer part (11, 13, 14) which is separate from the first outer part (3, 10), shaped like a beam and arranged on the household appliance (1) on the front side, wherein at least sections of the second outer part (11, 13, 14) are designed to be permeable to light in the spectral range that is visible for humans, and wherein the second outer part can be back-lit for the optical display of information via the second outer part (11, 13, 14).
