Abstract (en)

[origin: WO2017202986A1] The invention relates to an adhesive label (4, 4', 4", 4''') for attaching a security cable (3, 3', 3'') of an electronic security device (2) to an object to be secured against theft and/or manipulation. The invention also relates to a corresponding security cable (3, 3', 3''). The invention further relates to a security assembly (1) for securing an object against theft and/or manipulations, with at least one adhesive label (4, 4', 4", 4''') and at least one security cable (3, 3', 3''), as well as to a corresponding method. According to the invention, a connection section (35) of a flexible security cable (3, 3', 3'') is fixed to the object by means of a flexible adhesive label (4, 4', 4", 4'''), and during the fixing with at least one contact surface (42) of the adhesive label (4, 4', 4", 4'''), a counter contact surface (39) is electrically conductively contacted with the connection section (35).
