Abstract (en)

[origin: WO2017207047A1] The invention relates to an adapter for attaching a support device for a string instrument, in particular for a violin or a viola. The adapter comprises a first component, which has a region for encompassing the tailpiece knob of the string instrument, a second component, and a connection device. The first component and the second component are arranged and connected by the connection device such that the region of the first component encompassing the tailpiece knob is fitted in a stationary manner on the tailpiece knob.
