Abstract (en)
[origin: WO2018015104A1] The invention relates to a switching device arrangement, comprising an encapsulation housing (1). Furthermore, the switching device arrangement comprises a drive device (15). The drive device (15) is supported on the encapsulation housing (1), wherein the drive device (15) is arranged at a distance from the encapsulation housing (1) via a spacer device (13), a receiving space (16) being delimited by the spacer device (13).
