Abstract (en)  
[origin: WO2017202708A1] A contact element (1) for establishing electric contact between two contact pieces (K1, K2) comprises a support strip (2), which extends in a longitudinal direction (L) and is designed in such a way that the length of the support strip (2) changes in the longitudinal direction (L) when a force (F) is applied to the support strip (2), as well as a plurality of contact parts (5, 5a, 5b), each of which has a first contact section (6) for contacting one of the two contact pieces (K1, K2), a second contact section (7) for contacting the other one of the two contact pieces (K2, K1), and a fastening section (8) for securing the contact part (5, 5a, 5b) to the support strip (2).
