Abstract (en)

[origin: WO2017207210A1] The invention relates to an installation part (28) for a housing (8) of an electric machine (1), wherein the installation part (28) is designed to form a section (29) of a cooling channel (11) together with the housing (8) when the installation part is installed in the housing (8). The invention further relates to the housing (8), to the electric machine (1), and to a method for producing an electric machine (1).
