Abstract (en)
A packaging container, in particular for liquid foodstuffs such as drinks, comprising a sleeve (12) with a first and a second end part, wherein at the first end part, the sleeve is closed by a first disc (20), wherein said first disc is fixedly attached to the sleeve by means of a first and a second ring (22, 24), wherein at least a part of the outer casing surface of the first ring (22) is sealed to an inner casing surface of the sleeve, wherein said first disc is sealed to the second ring (24), wherein the second ring is fixed to the first ring, and wherein at said second end part, the sleeve has a first inner circumference and is closed by means of a second disc which has a circumference which is larger than said first inner circumference of the sleeve, so that a rim extending around the disc forms a sleeve part when the disc is arranged to close said second end part, wherein said sleeve part extends part of the way along the inner casing surface of the sleeve, and wherein a seal is formed between at least a part of the outer casing surface of the sleeve part and the inner casing surface of the sleeve.
