Abstract (en)

[origin: CN109629213A] A crease removal device (2) comprises a handle (4) and a steam discharging head (5) connected to the handle (4). The steam discharging head (5) comprises a processing face (13), which is equipped with at least one steam outlet and is used for vertically facing towards clothes for ironing. The steam discharging head (5) also comprises an instant steam chamber (18), including a cleaning opening (27), which has a surface different from the processing face (13) through the steam discharging head (5). The crease removal device (2) also comprises a closing element (26) for closing the cleaning opening (27), and the closing element (26) is detachable and can be approached from the external part of the crease removal device (2).
