Abstract (en)
A pool cleaner that may include a removable floatation and skimmer device (85), a submerged unit (10), a controller and a mechanism; wherein the submerged unit (10) comprises a propulsion module and a filter. The controller may be configured to receive or generate a connection indication that indicates whether the removable floatation and skimmer device (85) is connected to the submerged unit (10); operate the pool cleaner in an operational mode selected out of a skimmer mode and a submerged cleaning mode, based, at least, on the connection indication; and change the operational mode of the pool cleaner.
