Abstract (en)

A mounting assembly for mounting sliding doors to a substrate, the assembly comprising: - a mounting profile designed to be secured to the substrate and comprising a base defining a surface for abutting the substrate and at least four rims extending lengthwise along the entire length of the mounting profile from a surface opposite to the surface for abutting the substrate, two central rims of the mounting profile defining a fixation channel comprising screw holes for fixation of the mounting profile to the substrate; - a sliding door track comprising an elongated profile having a base configured to cooperate with the mounting profile and defining at least one running rail for accommodating a sliding door panel thereon.
