Abstract (en)
An object of the present invention is to enable relatively easy mounting preparation of a connecting terminal, and reduce interference with various components disposed in a housing while reducing thermal effect generated in a connecting terminal in assembly. A hermetic type compressor 1 includes a body housing 2 that has a cylindrical shape, and houses an electric motor 4 therein; an oil tank 10 having a space different from the body housing 2, a hermetic terminal 14 that is fixed to the oil tank 10, and is electrically connectable to an outside of the oil tank 10; and an electric cable 13 that is coupled with the hermetic terminal 14 and the electric motor 4, and electrically connects the hermetic terminal 14 and the electric motor 4, wherein the electric cable 13 is disposed inside the oil tank 10, inside the body housing 2, and inside a pipe 12 that connects the body housing 2 and the oil tank 10.
