Abstract (en)

[origin: WO2017216737A1] The system for controlling an actuator (10; 115) of a ram of a press comprises: a motor group (1; 101) that actuates a pumping group (2; 102); a ram that is hydraulically connected by a hydraulic system with the motor group (1; 101) and/or pumping group (2; 102) and that is movably actuated between a first stroke of approach to a piece to be worked, a second working stroke of the piece to be worked, and a third return stroke from a worked piece; the method for actuating the presses comprises controlling the approach stroke and/or the working stroke and/or the return stroke by the motor group (1; 101) connected with the pumping group (2; 102).
