Abstract (en)

[origin: WO2017211959A1] The invention relates to a recovery device comprising two hulls (12a, 12b) and a catching net (14) arranged between the two hulls for receiving an autonomous underwater vehicle (16). The catching net can be lowered from a non-lowered state of the catching net into a lowered state of the catching net such that the autonomous underwater vehicle can be received in the lowered state and can be transported in the non-lowered state.
