Abstract (en)

[origin: WO2017212502A1] A packaging system (1) for a rigid product (2) is described, adapted to package on-site the rigid product (2) by placing thereon a coating element (6) by a user of the packaging system (1) and/or a consumer of the rigid product (2), the packaging system (1) being composed of: a containing element (4) adapted to wrap and contain therein the coating element (6), possibly equipped with at least one graphic representation; a rotor means (3) equipped with a plurality of housings (13), each adapted to contain the containing element (4); a loading means (15) equipped with at least one access element (8), adapted to enable inserting and withdrawing by the user and/or consumer the rigid product (2) inside the loading means (15); and an actuator device, for placing the coating element (6) onto the rigid product (2).
