Abstract (en)

[origin: WO2017215932A1] The present invention provides a cleaning system comprising a spraying device and a foamable liquid cleaning composition, said spraying device comprising a container holding the foamable liquid cleaning composition, a spray head, and a liquid supply arrangement for transferring the foamable liquid detergent composition from the container to the spray head, said foamable liquid cleaning composition comprising: a) 1 to 20 wt.% of alkoxylated C8-18 alkyl ether sulfate surfactant having 1 to 30 moles of alkylene oxide; b) 0.1 to 3 wt.% of amphoteric surfactant; c) 2 to 12 wt.% of hydrogen peroxide; d) at least 65 wt.% water; said cleaning composition having a viscosity of less than 100 mPa.s at 25°C and 20 s-1, and forming a foam with a density of less than 0.4 g/ml when ejected from the spray device through the spray head. The cleaning system of the present invention can be used to deliver the cleaning composition in the form of a stable foam. This foam is particularly effective at removing stains from fabric.
