Abstract (en)
[origin: EP3469946A1] A softside luggage article (100) is provided. The luggage article may include a first panel, a frame supporting the first panel, and a carry handle. The frame may include a first structural member extending along a first edge of the first panel, a second structural member extending along a second edge of the first panel, and two or more cross braces connected to and extending between the first and second structural members. The carry handle may include opposing first and second end portions. Each end portion of the carry handle may be coupled to one of the two or more cross braces
