Abstract (en)

The present invention relates to a protective suit being CE approved according to European Norm Standards EN 469 or according to US National Fire Protection Association Standard NFPA 1971 to be worn by a wearer having a torso, during firefighting or similar operations, comprising one or more opening(s), an outer layer which is at least made of a flame-resistant material, an inner layer having a proximal part being closest to the torso and a distal part being closest to the opening, wherein the distal part has a first part and a second part, the first part comprising a close-fitting member, the first part and the close-fitting member comprising a moisture barrier, and the first part is detachable from the second part by means of a connection unit. The present invention also relates to a protective suit system to be worn by a wearer during firefighting or similar operations.
