Abstract (en)
[origin: EP3470550A1] The electrode head for an electrolysis installation of the invention comprises: an electrode rod (11) to which an electrode (12) can be secured; and, optionally, handling means (21, 211) of the head (1) fixed to the rod for transporting the head secured to the electrode by means of crane of the installation, incorporating a coating (13) on the rod with a varying thickness according to a longitudinal direction of the rod to provide a stop or an adjustment of the handling means and/or of an additional element (31).
