Abstract (en)

[origin: WO2018073217A1] The invention relates to a method for operating a motor vehicle (12) having a plurality of driver assistance systems (5), comprising the following steps: setting an assistance degree parameter (1), which indicates to what extent support of the driver by the driver assistance systems (5) is desired, by means of an operating interface (6) of the motor vehicle (12), setting at least one additional parameter (2) related to the driving operation of the motor vehicle (2) by means of the operating interface (6), specifying at least one operating parameter (4) for each driver assistance system (5), in accordance with which operating parameter the driver assistance system (5) is operated, by means of a processing device (3) of the motor vehicle (12) in accordance with the assistance degree parameter (1) and the additional parameter (2).
