Abstract (en)
[origin: WO2017215793A1] The invention relates to a hose storage adapted to receive a spiral hose (2). The hose storage comprises a tubular base body (3) confining a cavity (3.1) for receiving the spiral hose (2), said tubular base body (3) comprising an aperture (3.2) at the top side for removing the spiral hose out of the cavity. The cross-section of the tubular base body (3) increases towards the aperture (3.2). Furthermore, the base body (3) at least partially comprises a top portion (3.3) at which a wall portion of the base body (3) bulges outwardly thereby providing a rounded top portion (3.3).
