Abstract (en)  
[origin: WO2017219047A2] This disclosure concerns compositions and methods for promoting transcription and translation of a nucleotide sequence in a plant or plant cell, employing a 3'UTR from Zea mays chlorophyll a/b binding protein gene. Some embodiments relate to a 3' UTR from a Zea mays chlorophyll a/b binding protein gene that functions in plants to terminate transcription of operably linked nucleotide sequences.
