Abstract (en)

[origin: WO2017214733A1] The present invention relates to a belted compaction apparatus for compacting surfacing materials such as asphalt. In particular, a belted asphalt compactor conversion kit for converting a drum roller compactor into a belted asphalt compactor, the kit comprising a belted compaction apparatus securable to the frame of the compactor, the apparatus comprising a body; a pair of leading rollers at one end of the body and a pair of trailing rollers at the other end of the body; a plurality of intermediate rollers disposed between the leading and trailing rollers; a drive wheel; and a belt wound around the leading, trailing, and intermediate rollers, and the drive wheel, wherein the leading, trailing, and intermediate rollers exert a substantially downward pressure on the bottom run of the belt to provide a uniform pressure applying surface over the area of the belt in contact with the asphalt.
