Abstract (en)

[origin: WO2018036684A1] The invention relates to a motor vehicle handle assembly (4) which has: a rotatably mounted handle holder (7), a first longitudinal end (7a) of which can be mounted on a door (2a) or hatch (2b) of a motor vehicle (1); and a handle element (5) which can be operated by a user; wherein at least one socket (8) is formed in a second longitudinal end (7b) of the handle holder (7), and the handle element (5) has at least one fastening peg (9) which protrudes from the handle element (5); and wherein the at least one fastening peg (9) of the handle element (5) is inserted in the at least one socket (8). A connecting element (10) extends transversely to the insertion direction (22) of the fastening peg (9) inserted in the handle holder (7) and through a through-opening (23) in the fastening peg (9), wherein the at least one connecting element (10) connects the handle holder (7) and the handle element (5) detachably and interlockingly to each other.
