Abstract (en)

[origin: WO2017220926A1] Alarm sensor (20) for an opening member (1) of a room in a building, comprising an opening sensor (21) capable of detecting an opening event of the opening member, an inhibiting device (22) capable of at least determining the presence of a person in the interior space close to the opening member, and an electronic unit (23) capable of supplying the detection signal if the opening sensor has detected the opening event, and if the inhibiting device has not detected a presence during a first period before the opening event.
