Abstract (en)
[origin: EP3473113A1] This invention relates to a crimping unit for crimping a web (100) of material used to make tobacco industry products, comprising: - a feed station (10) provided with feed means (11) for feeding a web of material (100) used to make tobacco industry products; - a crimping station (20) which comprises a first crimping roller (21) and a second crimping roller (22) operatively coupled to make a plurality of longitudinal easy folding lines on the web (100) in transit between the two crimping rollers (21, 22). The crimping station (20) also comprises a supporting element (23) for supporting the crimping rollers (21, 22) and configured to adopt variable position and/or orientation in such a way as to vary the orientation of the web (100) being fed to the crimping rollers (21, 22).
