Abstract (en)

With a thermally insulated flat roof (1) based on a wood structure with a support body (2) and a covering (14) suspended from the support body, a thermal insulation (6, 8) out of particularly mineral wool is arranged between the support body (2) and the covering (14), with a humidity adaptive vapour retarder membrane (16) being arranged between the thermal insulation and the suspended covering and a sealing membrane (10) on a PVC basis being arranged on the support body.
