Abstract (en)

[origin: WO2019053547A1] An insulated glazing comprising at least one first plate-shaped element (10) and at least one second plate-shaped element (20) substantially transparent facing each other and spaced apart from each other of a predetermined distance (d) to define an inner chamber (2), mechanical coupling means (30) of the first and second plate-shaped element (10, 20) comprising at least one longitudinal profile (31) and at least one substantially transparent adhesive sealant polymeric resin (42) placed inside the chamber (2) in contact with the first and second plate-shaped element (10, 20) and the longitudinal profile (31) to reciprocally join them.
