Abstract (en)

[origin: WO2017220775A1] The present invention relates to a powdered slaked lime composition having an Alpine fluidity of greater than 50 % and comprising a first fraction of particles with a size less than 32 µm and a second fraction of particles with a size greater than 32 µm, the second fraction being less than 10% by weight in relation to the total weight of the composition. The invention also relates to a method for producing same.
