Abstract (en)

[origin: WO2017220255A1] The invention relates to a transformer device (200) having a transformer core (210), at least one primary winding and at least one secondary winding. The transformer device (200) also has an insert (220), in which the at least one primary winding is arranged, and a circuit board (230), in which the at least one secondary winding is arranged. The insert (220), the circuit board (230), and the transformer core (210) can be or are coupled to each other.
