Abstract (en)
[origin: EP3476247A1] The invention relates to a bag comprising: - a bag-like holder comprising a rear wall and a carrying strip provided over at least a part of the width of the rear wall, wherein the carrying strip is attached only partially to the rear wall for the purpose of forming at least a passage between the carrying strip and the rear wall; - at least one carrying element to be fastened releasably to the holder for carrying of the bag-like holder by a user, wherein each carrying element comprises a loop-like outer end which extends round the carrying strip in use; - a fastening for fastening an end part of the loop-like outer end of the carrying element to another part of the carrying element.
