Abstract (en)
[origin: CN210115338U] The utility model relates to a winding roller cleaning element which is used for cleaning a winding roller device, the winding roller cleaning element is provided with a bearing body and a plurality of grinding elements, the bearing body is provided with a basically cylindrical outer contour, and the grinding elements are arranged on the outer circumference of the bearing body. As a result, the availability of the winding roller can be optimally maintained in a simple manner and thus in a cost-effective manner depending on the wear that occurs.
