Abstract (en)

[origin: EP3477766A1] A rear glass for vehicle with an antenna, includes an opening portion; and a light shielding film arranged around the opening portion. The light shielding film includes a belt-like light shielding region extending in a horizontal direction of the rear glass for vehicle. The width of the light shielding region in the vertical direction of the rear glass for vehicle is 20 mm or more and 50 mm or less. An antenna including a plurality of elements formed so as to be able to receive vertically polarized electromagnetic waves is arranged in the light shielding region.
