Abstract (en)

[origin: WO2018007748A2] The invention relates to an accurate, quick, easy-to-use, hygienic and economical system for preparing and dispensing a personalized composition from N supplies (501-502) of active chemical compounds (A1-A2), N being an integer equal to or greater than 1. According to the invention, the system comprises a pneumatic pressure generator (200) that is connected to a pressure distributor (300) having N pressure switches (301-306), each of which includes at least one inlet (I1) that is connected to the pressure generator, one inlet (I2) that is connected to atmospheric pressure, and one outlet (311-316) that is connected to an inlet into a supply of an active chemical compound.
