Abstract (en)

[origin: WO2018007344A2] The invention relates to a device for selectively introducing a lens system (10) into a laser beam of a laser machining head, said device comprising: a lens system (10) and a movement unit (20) for moving the lens system (10); the movement unit (20) includes a driving element (210) and at least one coupling element (220) that couples the lens system (10) to the driving element (210).
