Abstract (en)

[origin: WO2018002481A1] The invention relates to - an aeronautic glazing comprising at least one sheet of modified acrylic, characterised in that said sheet is associated therein with at least one other sheet of modified acrylic, and/or at least one sheet of polymethyl methacrylate (PMMA) formed by casting, and/or at least one sheet of another transparent polymer such as polycarbonate (PC), and/or at least one sheet of in particular chemically toughened glass, in a laminated and/or multiple glazing; - the application thereof to an aerial vehicle.
