Abstract (en)  
[origin: WO2018002228A1] The invention relates to an elevator system (1), comprising at least one first guide rail (10), which is oriented in a first, in particular vertical, direction (z), at least one second guide rail (20), which is oriented in a second, in particular horizontal, direction (y), a plurality of rotatable rail segments (12, 23, 123), at least one of which can be transferred between an orientation in the first direction (z) and an orientation in the second direction (y), at least one elevator cab (2), which can be moved along the guide rails (10, 20) and which can be transferred between the different guide rails (10, 20) by means of the rotatable rail segments (12, 23, 123), and at least one third guide rail (30), which is oriented in a third, in particular horizontal, direction (x), wherein at least one of the rotatable rail segments (23, 123) can be transferred between an orientation in the first or second direction (z, y) and an orientation in the third direction (x).
