Abstract (en)

[origin: EP3479700A1] Provided are: an agent for improving feed efficiency in livestock, said agent being capable of enhancing the functions of a feed; a livestock feed for promoting body weight gain; a method for feeding livestock; and a method for suppressing methane generation. The agent according to the present invention for improving feed efficiency in livestock comprises a coffee component and has been fermented with a bacteriocin-producing lactic acid bacterium. The coffee component may comprise at least one member selected from among hydroxycinnamic acid and an ester thereof. The bacteriocin-producing lactic acid bacterium may be at least one member selected from among *Lactobacillus delbrueckii* subsp. *lactis* and *Lactobacillus brevis*. The livestock may be ruminants.
